

- **Engineering leader with 22 years of experience at Fortune 500 and high-growth technology companies** building enterprise-scale platforms in fintech, streaming media, and esports at Disney, Amazon/Twitch, and Brex, delivering category-defining products including DisneyLife (precursor to Disney+), Twitch Creator Dashboard, and the Brex AI automation suite.
- **Enterprise scale and organizational leadership:** built and led engineering organizations from 3 to 50+ people across multiple cities and countries, managed \$5M+ cloud and ML budgets, and delivered mission-critical platforms serving millions of users globally with 99.9%+ uptime.
- **Applied AI and product innovation:** grew automated receipt acquisition at Brex from 0 to 40 percent of expenses, lifted receipt-matching accuracy from 65 to 80 percent, launched AI-powered spend management platform driving 94%+ compliance, and delivered AI CX platform with over 50% containment.
- **Technical excellence and thought leadership:** two granted US patents in content curation and AI-driven narrative tone conversion, regular conference speaker, and proven track record of balancing innovation with compliance, reliability, and data-driven decision making.

Leadership Experience

Brex Head of AI Jun 2022 - present	• Scope: Leading 20-person AI/ML org; owned ~\$5M cloud/ML budget; platform supporting AI product features and \$10B+ risk models; DRI for org-wide AI enablement across engineering, product, and business functions. • Product: Grew AI memos to ~30% of expenses, scaled auto-receipts from 0 to 40% and improved matching 65 to 80%. This cut manual data entry by 300+ hours/month (avg mid-size org). Delivered AI-powered spend management platform driving customer compliance to 94+%. • Operations: Launched enterprise AI CX platform with over 50% containment and refactored back-office workflows delivering ~10x cost reduction. Platform handles thousands of customer interactions daily. • AI Engineering: Drove AI tool adoption and training across all functions; updated engineering interview loops to include AI coding challenges; led AI-driven codebase modernization project, migrating from Kotlin to TypeScript, increasing AI codegen rate to over 80%.
Trophy Cofounder and CEO Apr 2020 - Jul 2021	• Cofounded esports social platform as CEO, head of product, and full-stack engineer, building a cross-platform desktop app with real-time gameplay capture and analysis • Developed scalable web platform on Firebase with Django REST API, supporting gameplay clip sharing and social features

Amazon Twitch

Senior Manager,
Engineering

Feb 2019 - Apr 2020

- Led engineering, technical product, and project execution for Creator Business vertical serving Twitch's top revenue generators, managing 13 critical live services supporting millions of Twitch streamers globally with 99.9%+ uptime.
- Delivered Twitch Creator Dashboard from concept to TwitchCon keynote launch in 8 months, becoming primary creator management platform used by millions of streamers. Owned engineering, project management, and cross-functional stakeholder communication across product, design, and business teams.
- Managed distributed engineering teams across multiple time zones, established technical roadmaps, and drove adoption of best practices for reliability and scalability in high-traffic, real-time streaming environment.

Disney DCPI

Director, Engineering

Aug 2010 - Jan 2019

- Built and led engineering organization from 3 to 46 engineers across 4 cities (Seattle, Los Angeles, London, Bristol) with median retention of five years; established Disney's streaming media and mobile app capabilities; expanded consumer products and interactive media app portfolio to over 10 apps.
- Led engineering for launch of Disney's first cloud streaming service, DisneyLife (precursor to Disney+), in test markets, serving millions across UK, France, Italy, Ireland, and Philippines with multi-platform SVOD experience supporting web, iOS, tvOS, Android, Android TV, Kindle Fire, Fire TV, and Chromecast.
- Managed multi-million dollar cloud infrastructure budget, established engineering best practices, interview processes, and performance management systems. Partnered with product, legal, and business stakeholders to navigate complex licensing and compliance requirements across international markets.

Patents

Content Promotion Through Automated Curation of Content Clips - US Patent [10911803](#) (Apr 16, 2020)

Automated Conversion of Vocabulary and Narrative Tone - US Patent [10810382](#) (Oct 20, 2020)

Education

California Polytechnic State University, San Luis Obispo - B.S. in Statistics (2010) - Thesis: PageRank approximation with imperfect graph knowledge

Technical Experience

Cloud & Data: AWS, GCP, Snowflake, Databricks, DynamoDB, Spanner, PostgreSQL

AI/ML: OpenAI, Anthropic, Llama, SageMaker, LangChain, Vector DBs, Braintrust

Backend: Python, Go, Kotlin, Django, FastAPI, NestJS, Typescript

Frontend & Desktop: React / Next.js, React Native, Electron, TypeScript

DevOps & Observability: Terraform, Hex, Datadog, Retool, Jenkins, Docker, Kubernetes
